

# SOLIDCOM C1

1,000FT Full-Duplex Wireless Intercom Headset System

- ◆ DECT 6.0 with Encryption Technology
- ◆ Wideband Audio Quality from 100Hz to 7KHz
- ◆ Reliable Transmission in 1.9GHz Frequency
- ◆ Up to 1000ft-Radius Communication
- ◆ Portable & Handsfree
- ◆ With no Beltpack or Base station

*Real-time Handsfree Communication for Next-level Team Synergy*

# Wideband Clear Audio Quality for Precise Coordination

Supporting a Wideband frequency response from **100Hz to 7KHz** and premium **AEC** (Acoustic Echo Cancellation) performance, the Solidcom C1 intercom headsets ensure authentic and clear audio quality for effective teamwork.

Equipped with a directional microphone that captures the speaker's voice precisely while minimizing unwanted noise, the system renders an effortless conversation experience even in noisy environments.

# Stay Connected in 1000ft Coverage Zone

The transceiver built into the Solidcom C1 master headset creates a reliable wireless communication radius up to 1000ft. So your team can keep connected and move freely at a major event, filming site, or mass area operation. The Solidcom C1 HUB base provides the same scale coverage.

# Enhanced Stability and Security with DECT 6.0

Built on the powerful **DECT 6.0 platform**, the Solidcom C1 can prevent people outside the system from hearing your conversation with employed Encryption technology; and provide excellent transmission stability with doubled user capacity on the communication channel. Each headset is designed with a dual-antenna diversity scheme that reinforces anti-interference capability, guaranteeing secured and constant team communication in complex environments.

# Rechargeable & Replaceable Battery for Extended Working Time

Each intercom headset comes with a spare lithium battery for convenient field replacement, keeping systems up and running with minimal downtime. The batteries are rechargeable externally by a dedicated multi-port charger.

**Time for full charge:** 2.5h

## Run-time

Master headset: 5h-6h

Slave headset: 10h

# Comfortable to Wear All Day Long

Each single headset weighs only **168g**, which is lighter than an iPhone12, offering a comfortable wearing experience for long hours.

The headset is exquisitely crafted with **PC-ABS** materials, guaranteeing outstanding flexibility and durability.

On-ear foams and over-ear cushions are provided for different wearing preferences. Easy to replace and free to share.

# Ready Out of Box, Easy to Use

The headset system will automatically pair up right out of the box. Power up to kick off your day.

Tactile Volume Button Design to Prevent Mistouch

BIG button to Volume UP

SMALL button to Volume DOWN

Note: The A and B buttons are only activated when incorporated with the Solidcom C1 HUB base for grouped communication.

## Auto Mute Mic Boom

The headset's microphone assemblies feature an internal switch that automatically mutes or unmutes the mic when pushed UP or DOWN.

## Indicator Lights

RED LED FLASHING - Low Battery

GREEN LED FLASHING - NO Connection

GREEN LED KEEPS ON - Normal Operation

# Customizable and Expandable for Varying Team Size

All packages are easily expandable and can be incorporated into a HUB for up to 9-member simultaneous communication with AB grouping capability.

Solidcom C1 - 2S

Solidcom C1 - 3S

Solidcom C1 - 4S

Solidcom C1 - 6S

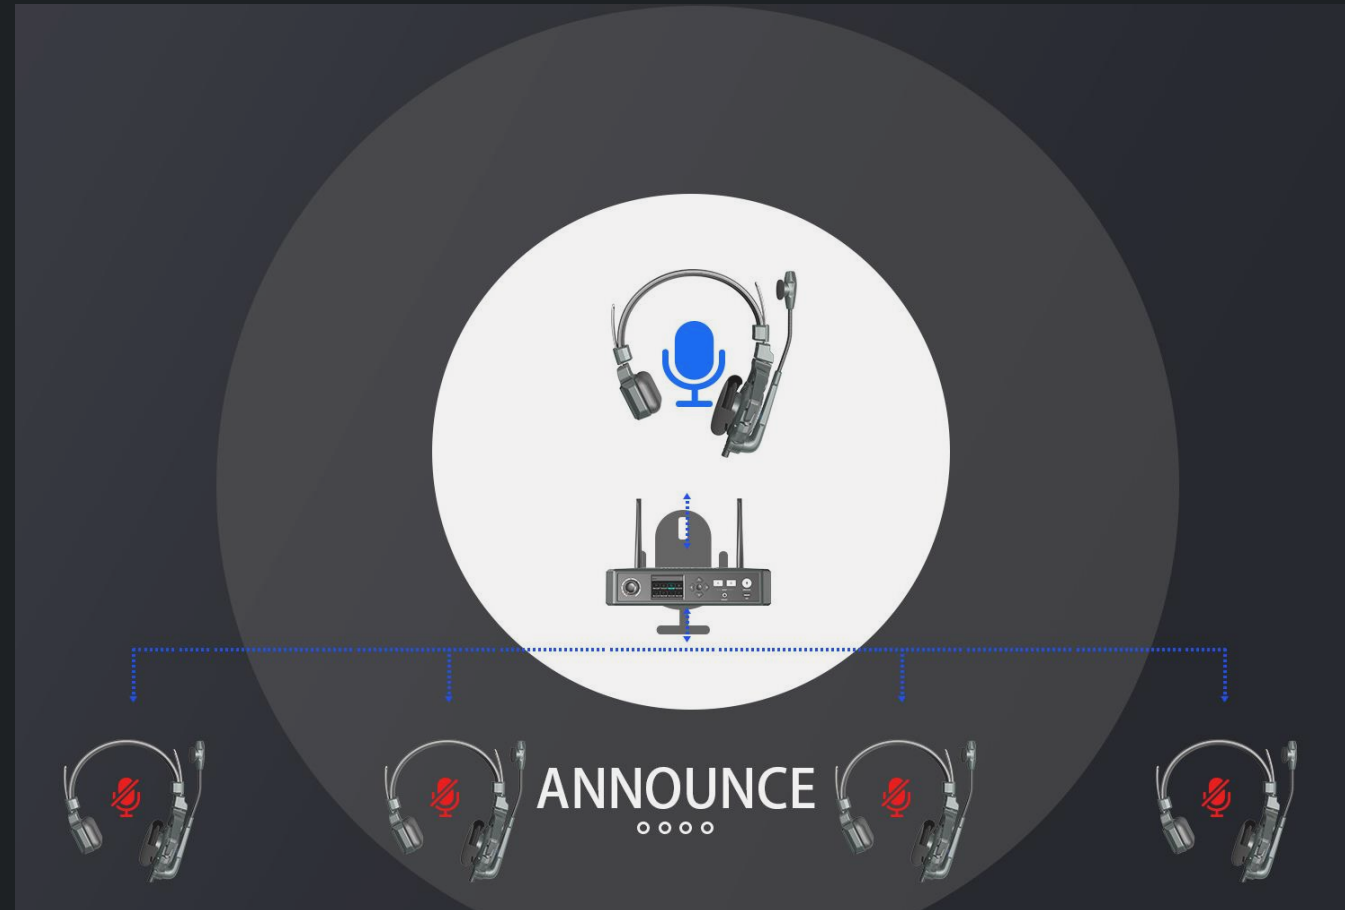

Solidcom C1 - HUB8S for 9 person  
(Support A/B Grouping and 3 sets cascading)

# An "ANNOUNCE" for Urgency (For Hub Version only)

The HUB station is designed with an one-key "ANNOUNCE" function. By activating the feature, the system will **MUTE** all headsets, allowing the whole crew to hear the direct instructions or commands from the HUB base in case of an emergency.

# Applications
